The screenshot displays a dark blue interface with a list of configuration options for RAVE RTSM Edit Live Design. At the top, there is a navigation bar with several icons. Below it, the options are listed in two columns:

- Add/delete randomization factors and factor states
- Add/modify/inactivate treatment scenarios
- Modify dynamic allocation options
- Modify Do Not Dispense days
- Modify randomization factor weights
- Add/modify visits
- Modify randomization supply check changes

1. Add/delete randomization factors and factor states

2. Add/modify/inactivate treatment scenarios

3. Modify dynamic allocation options

4. Modify Do Not Dispense days

5. Modify randomization factor weights

6. Add/modify visits

7. Modify randomization supply check changes
